OBJECTIVE

To be given an opportunity to exhibit my Programming skills and use my knowledge to contribute to the growth of the company.

RELEVANT SKILLS

Web Development Skills

- **Laravel Framework** – Expertise in Laravel MVC architecture, routing, Eloquent ORM, middleware, Blade templating, and custom artisan commands. Able to build secure, scalable web applications.
- **PHP (OOP & Core)** – Strong understanding of object-oriented programming with PHP; capable of writing clean, maintainable, and reusable code.
- **JavaScript & jQuery** – Efficient in using vanilla JavaScript and jQuery to create dynamic and interactive user interfaces. Skilled with AJAX for asynchronous operations.
- **HTML5 & CSS3** – Capable of building responsive and SEO-friendly websites with semantic HTML and modern CSS. Familiar with Flexbox, Grid, and animations.
- **Bootstrap & Tailwind CSS** – Quick in building responsive layouts using Bootstrap or utility-first Tailwind framework. Can convert Figma/PSD designs to code efficiently.

Database Management

- **MySQL / MariaDB** – Skilled in designing database schemas, writing complex SQL queries, and using foreign key relationships effectively.
- **Laravel Migrations & Seeders** – Can automate database creation and populate testing data efficiently using Laravel tools.
- **Performance Optimization** – Familiar with indexing, query optimization, and database caching techniques.

CMS & eCommerce

- **WordPress Theme Customization** – Proficient in modifying existing themes and building custom themes to match client branding.
- **Plugin Integration** – Comfortable with configuring third-party plugins and developing custom ones when needed.
- **WooCommerce Customization** – Experience in building eCommerce stores with custom features like product filters, carts, and secure checkouts.

Version Control & Deployment

- **Git & GitHub** – Proficient in version control using Git. Able to manage collaborative projects and resolve merge conflicts.
- **Local Development Tools** – Experienced with Laragon, XAMPP, and managing virtual hosts.
- **Web Hosting & cPanel** – Confident in deploying Laravel and WordPress projects to live servers, managing databases, emails, and SSL from cPanel.

RELEVANT SKILLS

Security & Performance

- **Form Validation & Custom Requests** – Can build secure forms using Laravel's custom request classes for validation.
- **Security Best Practices** – Familiar with XSS, CSRF, SQL injection prevention, and secure session handling.
- **Performance Tweaks** – Uses caching, pagination, and lazy loading for performance improvements.

Advanced Development Features

- **Payment Gateway Integration** – Integrated PayPal, Stripe, Razorpay, 2Checkout, SSLCommerz, Instamojo, Mollie, and Paystack in Laravel-based projects.
- **Real-time Features** – Built real-time chat and notification systems using Pusher, Laravel Echo, and broadcasting events.
- **Task Scheduling & Queues** – Used Laravel's built-in tools to automate tasks like sending emails or background processing.
- **Model Relationships** – Deep understanding of One-to-One, One-to-Many, Many-to-Many, Has-Many-Through, and Polymorphic Relationships in Laravel.
- **Multi-Vendor E-commerce Systems** – Developed complete eCommerce platforms with vendor panels, commission systems, and product management.

Other Technical Skills

- **API Integration & Auth** – Integrated third-party APIs and secured them using JWT, Laravel Sanctum, and Passport.
- **Schema Markup & OG Tags** – Implemented rich schema for SEO and open graph tags for better social sharing.
- **Error Handling & Debugging** – Strong in tracking bugs using Laravel logs, debug bar, and exception handling.

Soft Skills

- **Clear Communication** – Can explain technical terms in simple language, ensuring smooth collaboration with non-technical clients.
- **Time & Project Management** – Delivers projects within deadlines using organized workflows.
- **Problem Solving** – Naturally curious and loves solving tough development challenges.
- **Self-Motivated Learner** – Always learning new technologies and frameworks to stay ahead in the industry.
